

# December 21

Combining blank fabric squares with pieced blocks can make the borders quicker to construct and add more of a feature color. It can also add great negative space to add dimensional features through quilting if you are good at free motion quilting or have a long arm.

Blocks used: December 4, 6, 7, 12, blank squares of feature fabric 2

Note: the coloring of some blocks differs from the original coloring in the quilt center.
